

SANLORENZO

Global Order Book 2022:

Sanlorenzo still at the summit, reconfirming its world record as a monobrand shipyard.

Leadership also confirmed by record backlog

Press release, 17 December 2021 - Sanlorenzo remains stable at the top of the annual **Global Order Book**, the ranking compiled and published by **Boat International** - the magazine of reference in the nautical world - which certifies the trend of the international market for yachts over 24 metres in length.

With **117 projects in 2021** corresponding to a **total length of 4,159 metres**, more than 31 projects and 1,000 m more than in 2020, Sanlorenzo **once again confirms itself as the first monobrand shipyard in the world** in its sector, consolidating a constant growth trend over the years.

In line with the trend highlighted by the "Running Hot" Global Order Book analysis, which underlines a strong increase in the manufacturers' order book for the years 2022 and 2023, the company - listed on Euronext STAR since 2019 - is supported by a **record backlog that covers a significant part of the revenues expected in the next two years**.

The prestigious result of the Global Order Book 2022 comes at the end of a year of great successes for Sanlorenzo: among the most recent, we would like to highlight the contract signed by the **Superyacht Division** for a 72Steel, **the largest superyacht ever built by the shipyard**, destined to become the **new flagship of the fleet**, while in September Sanlorenzo announced an exclusive strategic partnership with Siemens Energy for the construction of a fuel cell system for the generation of electricity in a 50-metre superyacht, scheduled for delivery in 2024. It will be the world's first installation of a **fuel cell system in a superyacht**.

Sustainability and innovation are essential values for Sanlorenzo and are present in the development of each new project. **Propulsion systems with a reduced environmental impact** are flanked by a design that is increasingly projected towards the future with the **revolutionary concept of asymmetry**, featured on the **SL90A, SL96A and SL120A** models, demonstrating the company's strength and determination to achieve increasingly ambitious goals.
