

Sanlorenzo returns to the Palm Beach International Boat Show

At the American kermesse, the shipyard will exhibit a selection of models representative of the representative of the brand's tailor-made approach overseas

Press Release 22 March 2022 - Sanlorenzo confirms its participation at the 36th edition of the **Palm Beach International Boat Show**; one of the most important nautical events of the year, which will be held **from 24 to 27 March**, in the beautiful setting of West Palm Beach, Florida. The event's annual show attracts thousands of enthusiasts and for 2022 the selection of boats on display includes **some of the most distinctive models in Sanlorenzo's yacht fleet** created with the brand's unmistakable style, combined with a construction that responds perfectly to the demands of the American market.

The characteristics of the shipyard's historic line of semi-displacement yachts are illustrated by the **SD96**, a model that **takes the concept of transformable spaces to its ultimate form**, aimed at an increasingly enhanced on-board living experience. A three-deck yacht with the lightness of a two-deck yacht, with this boat Sanlorenzo succeeds in reinterpreting the typological balances in the name of transforming the clientele's requests for volumes and functionality.

Representing Sanlorenzo's planing models will be the **SL86**, which is characterised by innovations introduced on board such as the lowering of the bulwark at saloon height to let more light in through the large windows, and which **combines elegant, balanced lines with on-board innovations**. A highly successful boat that embodies the brand's vast experience and sartorial approach.

SX88 is a model in the crossover line, which combines the classic motoryacht with flying bridge and the explorer type in a unique boat, where the large open spaces and large glass surfaces create a perfect dialogue between indoor and outdoor. The **main deck of the SX88 is conceived as an open space**, reinterpreting the concept of space inside the boat by developing a single, continuous environment from stern to bow, a solution made possible by the wheelhouse positioned on the flying bridge, which frees up the area forward of the saloon on the deck.

Three different models for a single approach that combines tradition and innovation with a service tailored to the needs of American clients. With **Sanlorenzo Americas**, Sanlorenzo's brand ambassador in the US, the company has made a name for itself in the American market over the years by guaranteeing the highest quality and respect for the shipyard's core values, while at the same time responding to the needs of its overseas clientele.
